THE JOURNEY

ABOUT ME

I am an Indigenous advocate and a tech enthusiast. I discovered my passion for programming as a student at Coder Academy and I'm excited to see where the journey will take me. I am looking to join an organisation that will challenge my creativity and problem-solving skills every day. Where I can learn from, and collaborate with an experienced team of developers to create exciting and innovative projects. When I'm not programming you can most likely find me fishing my ball out of the water on the golf course, or enjoying some games with friends.

TECHNICAL STACK

LANGUAGES

- Javascript
- Ruby
- HTML
- CSS
- SCSS

FRAMEWORKS

- Rails
- Bootstrap

TOOLS

- Source Control
- Test Driven Development
- Github
- Terminal
- Trello
- Deployment Platforms: AWS, Heroku, Netlify

PROJECTS

CODE GUIDES MARKETPLACE APPLICATION

Code Guides is an online marketplace that provides a platform for junior developers to search for programming languages they wish to learn, and connect with relevant tutors.

Deployed Application - <https://code-guides.herokuapp.com/>

Github Repository - <https://github.com/DanielJamesK/code-guides>

FIRST TO 100 JAVASCRIPT GAME

This is a 2 Player game developed with Javascript where each player rolls the dice, the dice roll is added to their score, and if their score equates to 100 they win. However, if the user rolls a 1 their score is wiped and it is the next players turn.

Deployed Application - <https://upbeat-cray-5d50ee.netlify.app/>

Github Repository - <https://github.com/DanielJamesK/FirstTo100Game>

CODE LIBRARY TERMINAL APPLICATION

I developed this application as a resource for junior developers to help search for and save useful code snippets.

Github Repository - <https://github.com/DanielJamesK/CodeLibrary>
